PROFILE

Senior Frontend Engineer with 6+ years of professional experience, working in industries such as sports tech, e-commerce and banking, with clients such as Premier League, Myprotein, Santander and Ford. I pride myself in clean, maintainable code, with a focus on performance, accessibility and readability. I'm passionate about knowledge sharing, and constantly improving and adapting teams for success.

QUALIFICATIONS

EXPERIENCE

Kitman Labs, 2022-Present - Senior Frontend Engineer

- ❖ Took initiative and leadership of data importer refactor and redesign - built with React, RTK and MUI, from concept, to arranging design and roll-out plan, which drastically improved key workflows for multiple high profile clients
- ❖ Scrum master within the squad, facilitating ceremonies, and constantly adapting and implementing changes to increase story point output, whilst becoming more accurate on estimations and reducing pain points
- ❖ Integral role in key initiatives including integrating playwright into our workflow, converting our architecture over to SPA, and implementing analytical tools such as Mixpanel and Google Tag Manager
- ❖ Ran full cost analysis on CircleCI workflows, to adjust resource usages which reduced failure rates and duration, as well as costs
- ❖ Reviewing CV's, Interviewing candidates, buddy-ing new starters and mentoring colleagues
- ❖ **Technologies:** React, RTK, Flow, RTL, Jest, Circle CI

THG, 2020-22 – Frontend Engineer

- ❖ Worked on a mixture of new features and BAU using a tech stack of primarily React, Redux, JSS & Java, within the checkout team
- ❖ Worked on and lead multiple large projects, all live, being used by thousands of customers daily
- ❖ Lead workshops to wider team showcasing features, new technology and possible codebase improvements
- ❖ Conducting interviews and mentored new starters in the team
- ❖ **Technologies:** React, JSS, Redux, Jest, Java, Jenkins

Santander, 2020 – Software Engineer

- ❖ Integrated Cypress into Jenkins pipeline, to fully end-to-end test internal “rule engine” tool, built in Angular
- ❖ Maintained and improved Java microservices
- ❖ **Technologies:** Angular, Java, Jenkins, Cypress

BT, 2018-19 – AEM/React Developer

- ❖ Building AEM components in Angular before transitioning into a React SPA implementation, building components, documenting using Styleguidist and ensuring high unit test coverage using Jest
- ❖ **Technologies:** React, Sass, AEM, Angular, Java, Jest

Ford Motor Company, 2017 – Project Manager Internship

- ❖ Co-managed an IT Infrastructure project to streamline and increase efficiency of servers, working with large amount of capital with remote teams
