Dan Higgins

Front-end Developer

07826173615   danhiggins23@outlook.com   danhiggins.info

PROFILE

Over the last few years, I've been involved end-to-end in multiple different projects for high profile clients, in a range of roles from Back-End, Front-End and Full-Stack developer - to Project Manager. Over the last 18 months I've began to specialise as a Front-end developer, with a focus within React. I have the desire to continue this, and constantly learn new skills and knowledge in-line with the fast-pace nature of the industry.

EDUCATION

Teesside University
BSc Digital Forensics, 1st Class Honours

Open University
Introduction to Cyber Security

SKILLS

Front-end
ReactJS
Javascript (ES6)
JSS, SASS, CSS
Styleguidist

EXPERIENCE

THG, 2020-Present – Software Engineer

❖   Currently sat in the features team of checkout, working on a mixture of new features and BAU using a tech stack of primarily React, Redux, JSS & Java
❖   Worked on multiple large projects, all live, being used by thousands of customers daily
❖   Taken leadership of projects, end-to-end, from business requirement, to full rollout of feature
❖   Lead workshops to wider team showcasing features, new technology and possible codebase improvements
❖   Conducting interviews for future candidates and mentored new starters in the team
❖   Part of the out of hours rota
❖   Technologies: React, JSS, Redux, Jest, Java, Jenkins

Santander, 2020 – Full Stack Developer

❖   Collaborating within an agile project within the Fraud Prevention department in Santech
❖   Efficiently tested an internal node project using Cypress and integrated automation into Jenkins pipeline.
❖   Drove changes creating additional operators for an internal rule engine project to allow rules to be set to place blocks on cards/accounts.
❖   Collaboratively maintained/improved Java microservices to manipulate payloads
❖   Technologies: Angular, Java, Jenkins, Cypress

BT, 2018-19 – AEM/React Developer

❖   Involved within 2 agile project across BT, developing components for the support & mobile feature management section of the BT Business site.
❖   Began developing component in Angular JS and then shortly moved to a React implementation.
❖   Transitioned into a single page application implementation within React, producing components, documenting each using Styleguidist and ensuring high unit test coverage using Jest.
❖   Technologies: React, Sass, AEM, Angular, Java, Jest.

Ford Motor Company, 2017 – Project Manager

❖   Co-managed an IT Infrastructure project to streamline and increase efficiency of servers, working with large amount of capital with remote teams.
❖   Solely managed pilot project and brought a project from Red status to Green.
