CLIENTS & PROJECTS

Santander, 2020-Present – Full Stack Developer

- ❖ Efficiently tested an internal fraud prevention system, end-to-end, using Cypress and integrated automation into Jenkins Pipeline.
- ❖ Added further functionality to multiple Java microservices to manipulate payloads and add additional business logic.
- ❖ Enhanced business logic of Angular & Node project.
- ❖ Further developed knowledge of Continuous Integration with gitlab and Jenkins, adding cypress automation to the build.
- ❖ Technologies: Cypress, Java, Angular, Node, Jenkins.

BT, 2018-19 – AEM/React Developer

- ❖ Involved within 2 agile projects across BT, developing components for the support & mobile feature management/usage section of the BT Business site.
- ❖ Developed pure React components in a SPA implementation of AEM, producing components end-to-end, documenting each component using styleguidist and fully unit tested with JEST.
- ❖ Worked very closely with the UX/UI team to suggest improvements and gain clarification on functionality of components and states.
- ❖ Technologies: React, SASS, AEM, Angular, Java, JEST.

QA Consulting, 2018-Present – Consultant

- ❖ Gained a vast amount of knowledge within many technologies, frameworks and soft skills.
- ❖ Put these skills into practise across different projects, such as a Bank GUI Application written in Java 8 and using MySQL to store users, a CV management system written in React and connected to a MYSQL database using spring boot and many others.
- ❖ Technologies: Java, React, SQL, Mulesoft.

Ford Motor Company, 2017 – Project Manager

- ❖ Co-managed an IT Infrastructure project to streamline and increase efficiency of servers, working with large amount of capital with remote teams.
- ❖ Solely managed pilot project and brought a project from Red status to Green.

Civil Service, 2016 – Cyber Security Placement

- ❖ Gathered great knowledge within Python, Network Management, TCP/IP, OSI model and cyber security etc.
- ❖ Provided with a USB Rubber Ducky (Pentest tool) and began to learn the simple language to perform different penetration testing actions.
- ❖ Technologies: Python.
